JOLU Buzz

- *Alumni Bulletin*

Once a JOLU, Always a JOLU – pure pride

Special Edition

The Jalpaiguri Government Engineering College Alumni Association

Special Edition

Message from the Principal

On this special edition of the Alumni Bulletin, I would like to extend my warmest greetings to all members of the Jalpaiguri Government Engineering College Alumni Association (JGECAA). The publication is an incredible endeavour that links our alumni worldwide and acts as a link between our institution's past, present, and future.

Since its inception in 1961, Jalpaiguri Government Engineering College (JGEC) has produced generations of engineers throughout the years who have gone on to achieve remarkable success in a variety of sectors, including academia, industry, research, entrepreneurship, and public service. The college is proud and recognized for its achievements, and the Alumni Association is essential to maintaining these ties of community. By recording the memories in a way that motivates our current students and upholds the spirit of our community, the Bulletin captures the collective energy of our alumni.

I sincerely appreciate JGECAA's commitment and persistent work in creating this thriving network for the benefit of the students in terms of employment opportunities, internships, and research opportunities. A reader's corner developed by the association adds value to the Institute, where students can access learning materials beyond college hours. To explore the research, students' participation in the bio-composting project ignites the rest of the young minds of JGEC. From planning reunions and knowledge-sharing events to mentoring students and assisting with institutional development, the association's efforts have fostered a collaborative culture that benefits the alma mater and its alumni.

I want to express my gratitude on behalf of the college to the editorial staff and all contributors who helped make this issue possible. I do not doubt that this Bulletin will keep expanding as a source of knowledge, motivation, and pride for all JGEC family members.

Together, let's work to uphold the excellence tradition and strengthen the legacy of JGEC.

With warm regards,

Principal
Jalpaiguri Government Engineering College
Jalpaiguri

From The President, JGECAA

Dear Alumni,

By the way of introduction, I am Bhaskar Dasgupta, outgoing year 1983, the President of the JGEC Alumni Association @Jalpaiguri and on behalf of the new executive committee that has just been formed, I would like to share some of our initiatives with you, our valued members.

We want to get to know YOU!

Regular feedback/sharing sessions will be held for our members so please do keep a look out for our outreach messages and do turn up if you are free so that we can hear from you! We would love for you to also contribute your ideas and thoughts so that we can make the Alumni Association better for all of us. So all you Alumni Leaders out there, heads up!

We want you to be PROUD of being an AA Member!

Each and every one of us are proud of our alumni status and so the committee would like to look into the benefits and value that you would derive from being part of our Association. We have set up our very own alumni house, KANCHENJUNGA, A home inside our beloved JOLU Campus, where we can gather and cheer out with the rest of our JOLU Family. In order to make this happen, there are several working sub-committee and we hope you can be a part of! We want to tap on the collective brain pool of our alumni.

To be continued.....

In conclusion, I would like to thank each and every one for being our member thus far. The JGEC Alumni community has much to look forward to as the JGEC Alumni Association continues to strive towards bringing better benefits to our members in line with our long-term goals to making JGECAA great, a dream that cannot be achieved without YOU. The JGECAA is still young, and we need all the help we can get to push things through! So come on down and approach us with your thoughts and ideas! I most certainly hope to be able to work closely with all the passionate and talented people like yourself to see these plans come to fruition! As this is a volunteer organisation, we need all the help that we can get.

Bhaskar Dasgupta

Batch of 1983

Log of editors: Chaos, Coffee, Repeat!

JGEC Through the Ages 1961.62.63.....infinity

Once upon a time in Jalpaiguri—before smartphones became our third hand and AI started ghost-writing alumni newsletters (Seriously ?!) - there existed a magical place where engineers were forged in chalk dust, machine grease, and pure, unfiltered chaos. JGEC wasn't just a college. It was an adventure park cleverly disguised as an academic institution, minus the roller coasters- unless of course you consider our exam results. Civil engineers were sun-kissed surveyors, Mechanical students had oil stains and Electrical folks? They lived dangerously - one wrong switch away from enlightenment. It didn't matter if you were a Genu, a Ghoshu, or a Harmonium-Maestro - once inside, you were part of the glorious madness. Whether you graduated in Bell-Bottoms or Bluetooth earbuds, some things never changed: mess food that in our eyes earned Michelin stars; morning canteen rituals that felt more sacred than temple visits; and the eternal debate - who had it worse: Civil in the mud, Mech in the grease, or Elec in the sparks? And late entrants in this mad race, CS& IT in the labyrinth of flow charts (Spoiler: everyone lost, but we laughed anyway.) We built bridges (some metaphorical, some barely standing), fixed motors, and short-circuited more than our projects. We rode Dinos, hired rickshaws (some with curtains), rented cycles, and drove 100cc legends. From Teesta to Tea Gardens we romanced, from AC to PD we wandered, and from wall to calC back cover - we left our mark. Sometimes in the pen. Sometimes on the bench.

“We did not realize we were making memories – we were just having fun” – Old Jalu Proverb.

Now, some important sidebar!!

Why We Need an Alumni Association

Let's face it - adulting is hard, but staying connected shouldn't be! The JGEC Alumni Association (JGECAA) isn't just a nostalgic WhatsApp group, it's a powerhouse of purpose:

- Provide mentorship to current students Offer scholarships to deserving students
- Organize regular get-togethers, small meets to rekindle the spirits
- Finish internal projects that benefit the campus
- Create lasting bonds across batches and branches
- To extend hand at the hour of need
- and many more.....

Motto – “Thou must needs pretend, good sirrah, that thy noble hindquarters still dost fit snugly within thy ancient breeches of Dhulabari make, though they protest mightily and beg for mercy!”

Together, we can keep the Jalu spirit alive - and maybe even upgrade it to Wi-Fi 6.

A New Chapter: The Periodical Bulletin

Welcome to the first-ever edition of our periodical bulletin - a place where nostalgia meets news, and memories meet momentum. At regular interval, we'll bring you: - Alumni achievements (yes, we're bragging a little) - Campus updates (spoiler: the mess food still exists) - Upcoming events and opportunities (some with actual snacks) - Health, career, and community resources (because we care, and also because backs are cracking) Think of this as your monthly dose of JGEC vitamins - no side effects, just good vibes. Drop a line or two to JGECAumni1961@gmail.com – (statutory warning – mail ids/phone numbers of those pranksters forwarding good morning messages will be promptly shared with Sebananda Das and Bajaj Finance).

We Want Your Ideas!

Since this is our debut issue, we're all ears (and inboxes): What would you like to see in future bulletins? - Got stories, photos, or memes from your JGEC days? - Suggestions to improve the format, tone, or add more spice? Drop us a line, send a memory, or just say "Hi." Bonus points if you include a photo of your hostel room or your legendary cycle.

Last Comment (for the time being)!

Pages after pages can be written on Jolu, on the JGECAA, but alas! We have to stop somewhere, so before bid us adieu, last few lines:

The JGECAA is becoming a part of many activities. After this year AGM, numerous constructive decisions taken, be for the well-being of the Alumni with Super Top-up insurance plan, increasing the bonhomie of the college administration with the alumni, support for the present students and many more, these are going to be unfolded one by one in the coming days.

Here's the college that gave us degrees, drama, and decades of unforgettable stories. Long live the Jalu spirit—and may your circuits always be closed.

For and on behalf of the JGECAA bulletin vertical:

Partha Pratim Ghosh, 1991 batch

Sudip Mandal, 1992 batch

Mitul Ranjan Chakraborty, 1996 batch

Koushik Mondal, 1997 batch

Message

It gives me immense pleasure to extend my heartfelt congratulations to the Jalpaiguri Government Engineering College Alumni Association (JGECAA), Jalpaiguri, on the occasion of launching the Alumni Bulletin.

As an alumnus of this prestigious institution and having had the privilege to serve as its Principal, I feel a deep sense of pride and gratitude. JGEC has always stood as a symbol of academic excellence, professional growth, and character building. The years spent here have been transformative not only for me but for countless students who went on to excel in diverse fields across the globe.

The Alumni Bulletin is indeed a significant initiative. It will serve as a platform to celebrate the achievements of our alumni, share knowledge and experiences, and inspire present and future generations of JGECians. It will also strengthen the bond between the institution and its alumni, fostering a spirit of unity, collaboration, and mutual growth.

As a former Chairman of JGECAA, I had gone through the documents of all the national and international approval agencies for development and funding, it is mandatory to have a full-fledged alumni office with a seminar hall inside the campus of an engineering Institute. I talked to some senior and junior alumni and set up an alumni office with a meeting hall equipped with a land telephone and computer facility inside the administrative building which after the relentless efforts of the alumnus now became a grown-up tree at Kanchenjunga. I appreciate the relentless efforts of the Association in bringing together members of this ever-growing family and in sustaining the legacy of our alma mater. I am confident that this Bulletin will emerge as a beacon of inspiration, connecting the past with the present and guiding us all toward a brighter future.

I extend my best wishes to the Alumni Association for the success of this endeavour and for its continued service to the JGEC fraternity.

Long live Ferenty among JGECians!

Professor Jyotirmay Jhampati

Former Principal, Jalpaiguri Government Engineering College
B.E (First class first), Ph.D (Engg.), D.Litt, M.I.E.E (U.K), F.I.E(India), W.B.G.S, Chartered Electrical Engineer (India).
Banga Ratna (Awarded by Govt. Of West Bengal), Bharat Vidya Ratan (Awarded by International Business Council)

Jalpaiguri Government Engineering College (JGEC) Alumni Association: A Journey of Excellence

- Partha Moulik (Batch of 1961, First batch)

Ex- Executive Vice President, Kalyani Mukand group

Ex-Advisor, Mills Jindal South West

The JGEC Alumni Association was formally established in 2010, marking the beginning of a structured effort to connect former students with their alma mater. Before this, the JGEC campus had no active alumni initiatives, and the need for such a platform had become increasingly essential.

The Early Leadership

To initiate discussions, the then Principal, Prof. Jyotirmoy Jhampati, invited alumni back to the campus. In that historic meeting, the decision was taken to form an alumni body. Gautam Bhaduri (Batch of 1983) assumed the leadership role and, through his personal efforts, travelled to Kolkata to formally register the Association. With the signatures of a few alumni, the JGEC Alumni Association gained legal recognition.

A room was allotted on campus for the Alumni Association office, and “Nimu Da” was appointed as its first staff member. With no initial funds, Gautam Bhaduri personally financed the activities, enabling the daily functions to take off.

In October 2010, Nirjhar Chakraborty (Batch of 2000) joined Gautam Bhaduri in laying the foundation for a vibrant alumni network and in advancing the early initiatives.

Initial Initiatives: Seminars and Digital Outreach

The first national seminar at JGEC in 2011 was a landmark event, bringing together students, faculty, alumni, and staff. This initiative established a tradition of academic and professional engagement that continues to this day.

Building on this momentum, the Alumni Association embraced digital platforms. On 7th August 2012, under the leadership of Nirjhar Chakraborty, the official website was launched, providing alumni worldwide with a platform for communication, engagement, and collaboration.

Scholarship Program: Empowering Students

Soon after the website launch, the Alumni Association initiated a scholarship program to support deserving students. By late 2012, Bibhash Bhowmik (Batch of 1985) and Premangshu Ghosh (Batch of

1979) joined Nirjhar Chakraborty in launching the program, with Aminul Haque (Batch of 2014) and student volunteers playing crucial roles in organizing the events.

The seed of scholarship planted by Premangshu and Bibhash has today grown into a flourishing tree: by 2025, around 60 students have benefited annually, with scholarships amounting to nearly 12 lakhs.

Saptarshi Sarkar (Batch of 2013) created the Facebook group “What’s Happening in Jolu”, which helped spread information globally and engage alumni further.

Soon after, Brahmadev Sharma (Batch of 1980) began contributing to the scholarship program and became an integral part of alumni initiatives. Over time, with the active participation of many alumni, the scholarship program expanded further, and since 2021–22, Dr. Mausam Chatterjee (Batch of 2004) has coordinated it, ensuring continuity and greater impact.

Leadership Transitions and Kanchenjunga Alumni House

In 2013, after completing three years as the Association’s first Secretary, Gautam Bhaduri handed over to Prof. Amaresh Dalal (Batch of 2000), as per the constitution.

In July 2013, during the AGM, the Association resolved to acquire land inside the JGEC campus for an Alumni House. With funding support from Premangshu Ghosh, under the leadership of Prof. Dalal and guidance from Gautam Bhaduri, the land was purchased. The design of the Kanchenjunga Alumni House was led by Gautam Bhaduri, with Premangshu Ghosh as part of the design team, and the name “Kanchenjunga” was suggested by Premangshu himself.

Aloke Kumar Basu (Batch of 1969) has significantly contributed in the forming years of AA, which helped AA to overcome the initial financing problems. The contribution of Premangshu Ghosh has to be written in golden letters in the annals of AA. But for his financial help in buying the land for Kanchenjunga building, the project would not have taken off!

Fundraising initiatives for Kanchenjunga saw extraordinary support from alumni batches. Rajib Bhattacharya (Batch of 2000) spearheaded the fundraising with Gautam Bhaduri, Bibhash Bhowmik, and Nirjhar Chakraborty. Senior alumni such as Snehomoy Roy (Batch of 1967) provided strategic guidance to shape the building into a convention centre, while Dr. Mausam Chatterjee, Evelyn Bhunia (Batch of 2001), Dr. Mala De Sarkar (Batch of 2000), and Paromita Dutta (Batch of 2018) made critical contributions to both fundraising and construction.

In 2014, Partha Moulik (Batch of 1961, the very first batch) became President. He strongly encouraged alumni participation, ensuring the project became a truly collective effort. Later Presidents, such as Supravat Chattopadhyay (Batch of 1968) and Bhaskar Dasgupta (Batch of 1983), took these initiatives to new heights.

Digital Connectivity

In 2016, the Association opened its first WhatsApp group, initiated by Nirjhar Chakraborty and prototyped by Rajib Bhattacharya. This platform significantly enhanced global alumni connectivity, coordination, and engagement, creating a strong foundation for years to come.

Kanchenjunga Construction and COVID-19 Initiatives

With steady fundraising, the construction of the Kanchenjunga building began. Under the project management of Rajib Bhattacharya, guided by Gautam Bhaduri, and with active support from Koushik Mondal (Batch of 1997), Bibhash Bhowmik, Nirjhar Chakraborty, Bhaskar Dasgupta, and many more alumni, the structure started taking shape. Paromita Dutta actively contributed during construction, ensuring that alumni collaboration remained strong even in difficult times.

During COVID-19, the Alumni Association became a crucial platform for global alumni to connect. WhatsApp groups provided moral and emotional support, while online programs engaged students and encouraged creativity. Under the leadership of Nirjhar Chakraborty, alumni produced the first official college film released on YouTube and launched other initiatives to support the JGEC community.

Despite the pandemic, construction continued, and in August 2022, the first floor of Kanchenjunga Alumni House was inaugurated—standing as a testament to alumni collaboration, leadership, and excellence in project execution. Post-2019, the three-storey structure was completed smoothly despite challenges, thanks to the determined efforts of Rajib Bhattacharya (Batch of 2000) and his team.

NAAC Audit and Institutional Recognition

During JGEC's NAAC audit in 2020–21, the Alumni Association played a vital role in showcasing the college's achievements and alumni engagement. Alumni from the very first batch to the most recent returned to campus, met with NAAC auditors at the Kanchenjunga House, and demonstrated their contributions and involvement.

This participation significantly boosted NAAC evaluation, highlighting structured alumni initiatives as a major institutional strength. The then Principal, Prof. Amitava Roy, played a pivotal role in coordinating the event, emphasizing the importance of alumni and facilitating global engagement. Through effective communication across networks, the Alumni Association reinforced itself as a strategic platform for JGEC—connecting students and alumni, and strengthening the entire college community.

Collective Efforts and Lasting Impact

The success of the JGEC Alumni Association is a story of collective effort, vision, and dedication. From the pioneering steps of Gautam Bhaduri, Bibhash Bhowmik, Premangshu Ghosh, and Brahmadev Sharma, to the contributions of multiple batches—including Rajib Bhattacharya, Snehamoy Roy, Mausam Chatterjee, Evelyn Bhunia, Dr. Mala De Sarkar, Partha Moulik, Bhaskar Dasgupta, and Parmita—and with support from students like Aminul Haque and Saptarshi Sarkar, a vibrant and lasting platform has been built.

Through seminars, workshops, scholarships, digital outreach, holistic development, COVID initiatives, and NAAC participation, the Alumni Association has elevated the reputation of JGEC and built a model of alumni collaboration that continues to inspire future generations.

With inputs from Nirjhar Chakraborty (Batch of 2000)

P.S.

We have tried to provide a simple snapshot of the journey of JGECAA from 2013 to 2025. Alumni and faculty members alike have extended their hands to bring the Association to its present form—a commendable achievement deserving of a standing ovation! Some names or incidents may have been unintentionally left out, and any such omissions are sincerely regretted.

Why Engineers Excel as Management Graduates: A Perspective on Emerging Trends

- Sudip Mandal (JGEC 92, IIMC 99)

Sr Director NTT DATA, USA

Introduction

In an increasingly complex and technology-driven business landscape, we engineers are uniquely positioned to get a management education which offers us a distinct competitive advantage. An engineering degree equips us with a rigorous analytical prowess, systemic thinking, and a deep understanding of technical processes—skills that are essential for solving multifaceted and complex organizational challenges. These capabilities serve as a strong foundation for management education, where strategic decision-making, financial acumen, and leadership development are emphasized. Anyone of us entering management programs will bring a unique perspective and data-driven mindset that enhances our ability to align operational efficiency with business objectives, making us valuable contributors to both innovation and execution.

Think about it – we are the best suitable to lead in environments where technical depth and strategic oversight intersect!!!

Let us examine the above premise in more detail :-

Historical Management Techniques (1940s–2000s)

Technique	Era	Originator/Company	Primary Focus	Tools/Methods
Scientific Management	1940s–1950s	Frederick Taylor	Efficiency & Productivity	Time studies, task standardization
Management by Objectives (MBO)	1954	Peter Drucker	Goal Alignment	SMART goals, performance reviews
Theory X and Theory Y	1960s	Douglas McGregor	Motivation & Assumptions	Behavioral theory, employee engagement
Total Quality Management (TQM)	1950s–1980s	Deming, Juran	Quality & Continuous Improvement	Statistical control, PDCA cycle
Management by Walking Around	1980s	Tom Peters	Employee Engagement	Informal observation, direct interaction

Six Sigma	1986	Motorola	Defect Reduction	DMAIC, statistical analysis
Lean Management	1990s	Toyota	Waste Reduction & Value	Kaizen, value stream mapping
Kanban	2000s	Toyota / David J. Anderson	Workflow Visualization	Boards, WIP limits, pull systems

While many of these techniques—except perhaps TQM and Six Sigma—do not explicitly require a data-driven mindset, they laid the groundwork for modern management practices.

Modern Management Techniques (2020s Onward)

Technique	Era	Originator/Company	Primary Focus	Tools/Methods
Hybrid Management Methodologies	2020s	Various (Agile, Lean, Waterfall)	Flexible Project Execution	Agile boards, Lean tools, Waterfall planning
Agentic AI-Driven Management	2020s	OpenAI, Anthropic, etc.	Autonomous Task Execution	AI agents, automation platforms
Human-AI Symbiosis	2020s	MIT, Stanford, Industry Labs	Collaborative Intelligence	AI augmentation, co-creation tools
Value Management Office (VMO)	2020s	Scaled Agile Framework (SAFe)	Strategic Value Delivery	Value streams, OKRs, portfolio alignment
AI-Enhanced OKRs	2020s	Google, Microsoft, Startups	Goal Optimization	AI-driven OKR platforms, predictive analytics
Sustainable and ESG-Centric Management	2020s	UN, ESG Frameworks	Environmental & Social Impact	ESG metrics, green KPIs, circular economy
Humanized Leadership &	2020s	Leadership Institutes	Empathy & Team Engagement	EI training, feedback loops, coaching

Emotional Intelligence				
Fractional Leadership	2020s	Startups, Consulting Firms	Flexible Executive Expertise	Part-time CXOs, interim leadership

As can be noted, except may be the last two – each one of the above will give a distinct advantage to the engineer. Also, point to be noted that most of these emerged in high-tech engineering industries but in fact are domain agnostic. Example – with the advent of Industry 4.0 or automation and sustainability goal, Manufacturing Industry is now distinctly leaning towards ESG-centric or Agentic AI based management.

Closing Remark

In summary, we the engineers, possess a unique blend of technical expertise and analytical rigor that, when combined with modern management education, positions us as transformative leaders in any industry. As organizations strive for innovation, efficiency, and sustainability, engineer-managers will remain at the forefront of shaping the future of business.

Annexure A – Case Study

Engineering Leadership in Manufacturing Transformation

One famous recent case study that comes into mind is a recent development in Siemens AG, a global leader in industrial manufacturing involving Dr. Martina Schraudner, engineer with a management background, to lead their transformation initiative to Industry 4.0 framework. Siemens was facing substantial challenges to meet the demanding KPI for the new standard, and employed Dr. Schraudner to lead them thru this journey.

Drawing on her management education, Dr. Schraudner introduced hybrid management methodologies, combining Lean principles with Agile project management. She also implemented AI-driven predictive maintenance and ESG-centric practices to optimize resource use and reduce environmental impact.

The results?

- 🔧 Production efficiency increased by 18% within the first year.
- 🔧 Machine downtime was reduced by 30% through predictive analytics.
- 🔧 Employee engagement improved due to inclusive management practices and transparent communication.

The plant achieved ISO 14001 certification for environmental management, aligning with Siemens' sustainability goals. Read more about it in <https://www.strategypunk.com/digital-transformation-by-design-the-siemens-strategy-house/>

Annexure B – Fun Facts

1. The Word “Engineer” Comes from Latin → The term “engineer” is derived from the Latin word ingenium, meaning “cleverness” or “talent.”
2. Engineers Make Great CEOs → Over one-third of Fortune 500 CEOs have an engineering background, including leaders of companies like Microsoft, Amazon, and General Motors.
3. Kanban’s Origins → The Kanban system was inspired by the way supermarkets restock shelves—Toyota engineers adapted this idea to revolutionize manufacturing.
4. Management by Walking Around (MBWA) Was Popularized by HP → Hewlett-Packard’s founders, Bill Hewlett and Dave Packard, used MBWA to foster innovation and employee engagement.
5. Six Sigma’s Name → “Six Sigma” refers to a statistical concept where a process is so well controlled that only 3.4 defects occur per million opportunities.
6. Lean Management’s “Kaizen” Means “Change for Better” → The Japanese word “Kaizen” is central to Lean Management and emphasizes continuous, incremental improvement.
7. Women in Engineering Management → The number of women in engineering management roles has doubled in the last decade, reflecting a growing emphasis on diversity and inclusion.
8. Engineers Love Coffee (my personal favorite) → According to surveys, engineers are among the top professions for coffee consumption—fueling both late-night coding and strategic planning sessions!

Data Source

Closing Remark

Now, time for a million-dollar question – will AI eradicate the role of managers?

IMHO, not likely - unless Mr. AI suddenly develops a taste for awkward team-building exercises and endless PowerPoint presentations!

While AI can crunch numbers, schedule meetings, and even ghost-write an RFP response, it still can't replace the classic manager's ability to drive a team, cast doubt on favoritism, or deliver a "motivating" talk before a big deadline. In the future, managers might spend less time chasing spreadsheets and more time doing what humans do best: inspiring, connecting, and occasionally pissing off everyone. So, no, AI – at least in its current format- is not going to replace managers.

But hey, what about AGI?

Hopefully I will retire by then. Go figure!!

Dialogues That Matter

Face to face

with

ABHISHEK BASU (JGEC Batch of 2000)

Head – Civil Engineering, Adani Infra India Limited

How do you view the current academic environment in India's engineering institutions compared to when you were a student at JGEC?

AB: I feel, since our time of millennial transition, engineering institutions in India have come a long way in terms of infrastructure as well as access to global knowledge & digital resources. However, the rigor and discipline that defined our time at JGEC are often diluted today. While students are more tech-savvy and exposed to global trends, the academic environment needs to push harder on fundamentals and field-readiness. The gap between theory and practice remains too wide.

In your opinion, what changes are needed in our curriculum and teaching-learning practices to align with global standards?

AB: In my opinion, to meet global benchmarks, we must overhaul our curriculum with:

- **Outcome-driven learning:** Focus on solving real-world problems, not just passing exams.
- **Industry-aligned modules:** Include sustainability, digital engineering, and global codes.
- **Interdisciplinary integration:** e.g., Automation, AI in core engineering.
- **Faculty immersion:** Encourage educators to spend time in industry to stay relevant.
- **Incubation:** Setting up of innovation labs and incubators.

We need to stop teaching “what to think” and start teaching “how to think”.

What is your assessment of the present job market for fresh engineering graduates, both in core sectors and IT/related industries?

AB: I believe, the job market for fresh engineering graduates is dynamic. While Core sectors like infrastructure, energy, and manufacturing are seeing renewed investment, especially in India, however, competition is intense, and IT/tech industries continue to absorb a large share of talent due to their scalability and global demand. For Core sectors, opportunities exist in smart cities, logistics hubs, climate-resilient infra etc. - but only for those who bring more than just a degree.

Apart from technical knowledge, what essential skills should students focus on to enhance their employability?

AB: Employability today is all about agility. Students must build:

- **Communication skills:** Articulating ideas clearly in both technical & non-technical settings.
- **Collaboration & adaptability:** Engineering is a team sport. Develop coworking attitude.
- **Digital literacy:** Learn tools like BIM, GIS, and simulation software.

- **Project thinking:** Understand timelines, budgets, and stakeholder dynamics.
- **Professional ethics:** Safety, ESG compliance, and integrity are non-negotiable.

Why does a gap still persist between industry expectations and academic training? What practical steps can institutions take to bridge this gap?

AB: The gap persists due to limited interaction between academia and real-world engineering challenges. Institutions often lack updated lab facilities, and faculty may not have recent industry exposure. Industry moves fast - academia doesn't always keep pace. To bridge this:

- Curriculum should be co-designed with industry experts.
- Make industrial exposure mandatory for faculty.
- Regular guest lectures and workshops by practicing engineers must be institutionalized.
- Embed live case studies and project site visits into coursework.
- Fostering critical thinking and practical problem-solving.

How can industry partnerships, internships, and live projects be better integrated into the curriculum?

AB: Internships should be mandatory and credit-based, with clear learning outcomes. Live projects - especially in infrastructure - can be integrated through:

- Partner with companies for semester-long live projects.
- Assign mentors from industry for every final-year project.
- Participation in national-level competitions / hackathons focused on engineering solution.
- Create joint labs and innovation hubs.
- Mandatory assignment-based industrial visits.

From your perspective, how can alumni associations like JGECAA contribute meaningfully to student development and institutional growth?

AB: Alumni are the institution's living legacy. JGECAA can be powerful enablers through:

- Sponsor scholarships, lab / other infra upgrades and research chairs.
- Host career bootcamps and leadership talks.
- Facilitate industry visits and job referrals.
- Create a repository of case studies and best practices from alumni experiences.
- Facilitate MoUs with companies for internships and placements.

We must move from nostalgia to impact creation.

What role do you see for alumni in mentoring current students and creating professional networks for them?

AB: Alumni can mentor students through structured programs - virtual or in-person. This helps students:

- Understand career paths and specialization choices.
- Build professional networks early that open doors to jobs, projects, and collaborations.
- Gain insights into workplace culture and expectations.

- Receive real-world insights and feedback.
- Get guidance for start-up / entrepreneurship.

One constructive conversation can shape a career.

How can institutions encourage a stronger culture of research, innovation, and entrepreneurship among undergraduates?

AB: Institutions must foster a culture where curiosity is rewarded. This can be done by:

- Encouraging undergraduate research through funded mini projects / prototypes.
- Collaborating with industry on applied research problems.
- Hosting annual tech fests focused on problem-solving and entrepreneurship.
- Create innovation labs and incubators for engineering startups.
- Encourage cross-disciplinary collaboration - civil + data science, for example.

Innovation thrives where curiosity is protected. Celebrate the failures as learning milestones.

Finally, what message would you like to convey to your fellow alumni of JGEC and to the current students who will soon join the professional world?

AB: To my fellow alumni: Let's stay connected and contribute towards holistic growth of our alma mater - not just financially, but through time, ideas, mentorship, and collaboration.

To current students: The world is changing rapidly. Stay curious, stay grounded, and never stop learning. Your foundation at JGEC is strong - build on it with integrity and purpose. Be bold, be ethical, and be relentless in your pursuit of excellence. Your journey starts now.

You will be remembered always!

It is with profound respect and heartfelt gratitude that the Jalpaiguri Government Engineering College Alumni Association (JGECAA) dedicates this space to all our departed alumni. Their lives, continue to shape our world in countless ways. Their contributions, are woven into the very fabric of our shared history.

প্রান্তনীদেব উদ্যোগে জলপাইগুড়ি ইঞ্জিনিয়ারিং কলেজে রিডার্স কর্নার

নিজস্ব প্রতিনিধি, জলপাইগুড়ি: প্রান্তনীদেব উদ্যোগে শনিবার জলপাইগুড়ি গভর্নমেন্ট ইঞ্জিনিয়ারিং কলেজে চালু হল রিডার্স কর্নার। এখানে কলেজের পড়ুয়াদের জন্য বিভিন্ন বইপত্র ও দেশ-বিদেশের জার্নাল, ইন্ডাস্ট্রির কেস স্টাডি থাকবে, যা থেকে উপকৃত হতে পারবেন ছাত্রছাত্রীরা। রাত আটটা পর্যন্ত ওই রিডার্স কর্নার খোলা থাকবে। ফলে পড়ুয়ারা কলেজ শেষের পরও সেখানে বসে পড়াশোনার সুযোগ পাবেন। এছাড়া বিভিন্ন নামী শিল্পে উচ্চপদে কর্মরত জলপাইগুড়ি ইঞ্জিনিয়ারিং কলেজের প্রান্তনীরা

নিয়মিত এই রিডার্স কর্নারে এসে পড়ুয়াদের সঙ্গে আলোচনা করবেন।

মূলত কলেজে সিলেবাস ভিত্তিক পড়াশোনার সঙ্গে শিল্পক্ষেত্রে কাজ করার বাস্তব অভিজ্ঞতার যে ব্যবধান রয়েছে, সেটা ঘোচানোই মূল টার্গেট বলে জানিয়েছেন প্রান্তনীরা। তাঁদের বক্তব্য, রিডার্স কর্নারের মাধ্যমে জলপাইগুড়ি ইঞ্জিনিয়ারিং কলেজের পড়ুয়াদের শিল্পক্ষেত্রে কাজের জন্য আরও উপযুক্ত করে তুলতে এই উদ্যোগ নেওয়া হয়েছে। কলেজের অধ্যক্ষ অমিতাভ রায় প্রান্তনীদেব এই উদ্যোগকে সাধুবাদ জানিয়েছেন।

Work of Kanchenjunga

1. Outside painting complete
2. Major electrical work complete except few things

Pay a visit to Kanchenjunga to see yourself!

KANCHENJUNGA- Proud possession of the Alumni

Let's Keep "Kanchenjunga" Thriving! - Appeal for Annual Contribution.

Dear Fellow Alumni,

Thanks to the incredible dedication and support from all of you, our dream project, "Kanchenjunga," is almost complete! This is a huge achievement for our community, but it's also just the beginning. All of us is willing to see our very own Kanchenjunga as beautiful and glamorous in the coming years also as it is now.

To ensure "Kanchenjunga" remains a valuable asset for both students and alumni for a long time, we need to set up a solid plan for its regular operation and maintenance. We have thought that the time has come to engage one personnel, who will be responsible for daily operation and regular maintenance of the Kanchenjunga.

The estimated monthly expenditure in this head will be approximately 40,000/-. After a detailed discussion at our last Annual General Meeting, it was agreed upon that a subscription-based support system of the Alumni may be envisaged which is expected to be of great help, alongside other existing funding methods like financial support and one time donations.

Therefore, each and every member of the big Jolu fraternity are requested to come forward and commit to an annual contribution of at least ₹1000/-. If more and more alumni come forward, it will help in build up a coffer for the Alumni activities.

We've already had a fantastic start—at our recent AGM, 24 members generously contributed ₹24,000 to get the initial impetus.

I, on behalf of Alumni Association personally appeal to you to support this effort. Please scan the QR code below and contribute ₹1000/- for one year.

Your support means the world to us.

Best regards,
Secretary,
JGEC AA
